

◆ Course Information

- This course introduces participants to Kaizen as a practical daily improvement approach for factory teams. Participants will learn how to identify improvement opportunities, structure small Kaizen activities, involve team members, use simple problem-solving tools and sustain improvements through visual follow-up and standardisation.

◆ Course Objectives

- Upon completion of this program, participants will be able to:
- Understand Kaizen principles and the difference between maintenance and improvement
- Identify improvement opportunities in safety, quality, delivery, cost and morale
- Apply PDCA, 5 Why and simple visual tools to structure Kaizen activity
- Develop practical Kaizen ideas and convert them into action plans
- Understand how to sustain improvements through standards, follow-up and team involvement

◆ Who Should Attend

This course is designed for Managers, Team Leaders, Supervisors, Executives, Engineers and frontline support teams involved in daily improvement activities.

Included but not limited to: Production, Engineering, Maintenance, Quality Assurance/Quality Control, Planning, Warehouse, Facilities, Process Improvement, Continuous Improvement, Lean Operations and Kaizen teams.

◆ Methodology

Variety of training techniques and methods: including actual customized case study for real-life application
Lively two-way interaction training facilitation.

Role play to give feedback to subordinates and group presentation to dive deeper understanding of the techniques and application in the real world.
