

◆ Course Information

- This course introduces participants to a practical management review and continuous improvement process for converting performance data, audit findings, customer feedback and operational issues into clear actions. Participants will learn how to structure review meetings, identify risks and opportunities, assign ownership, follow up actions and strengthen the PDCA cycle across departments.

◆ Course Objectives

- Upon completion of this program, participants will be able to:
- Understand the purpose and flow of an effective management review process
- Review key inputs such as KPI performance, audit findings, customer feedback, risks and improvement actions
- Analyse performance gaps and convert review findings into corrective and improvement plans
- Define ownership, timeline, escalation and follow-up for review actions
- Strengthen the link between management review, PDCA and continuous improvement culture

◆ Who Should Attend

This course is designed for Managers, HODs, Team Leaders, Executives and Engineers involved in management review, KPI monitoring, audits and operational improvement.

Included but not limited to: Production, Quality Assurance/Quality Control, Engineering, Maintenance, Planning, Warehouse, Purchasing, Process Improvement, Continuous Improvement, Lean Operations and Management System teams.

◆ Methodology

Variety of training techniques and methods: including actual customized case study for real-life application
Lively two-way interaction training facilitation.

Role play to give feedback to subordinates and group presentation to dive deeper understanding of the techniques and application in the real world.
